6. Availability of assistance to other countries in the field of natural disaster reduction.

(Please list potential resources, scientific expertise, technology, etc.)

In principle every type of assistance, that can be expected from a highly industrialized and developed society, can be requested through the National Coordination Centre (Landelijk Coördinatie Centrum) of The Ministry of the Interior. The Netherlands will then try to meet the demands as appropriate, in consultation/cooperation with other relevant departments.

7. International assistance required for natural disaster reduction

(Please indicate requirements for scientific expertise, technology, resources etc.)

No specific requirements for assistance.
In case of a large scale disaster there exists the possibility for assistance through the mutual assistance agreements with Belgium and Germany.
Assistance can also be asked from the European Union member nations, through the European Commission based on the EC resolution from 8 July 1991.
This excludes assistance for nuclear incidents which will be coordinated by the IAEA in Vienna.

SECTION B: STRATEGIES AND ACTIVITIES

(This section deals with current or planned strategies and activities.)

1. Steps towards achieving the 3 main Decade targets

- (a) Comprehensive national assessments of risks from natural hazards, with these assessments taken into account in development plans;
- Identification of hazard zones, hazard, vulnerability and risk assessment is done for the prevailing hazards (windstorms, riverfloodings, sea-floodings, blizzard and glazed frost).
- (b) Mitigation plans at national and/or local levels, involving long-term prevention and preparedness and community awareness; and
- Long-term prevention measures:
 1. Windstorms (a) non-structural: ---
(b) structural: appropriate building codes with high wind resistibility
 2. Floods (a) non-structural: Delta-act 1957 (branches of the delta are closed by Delta-works)
(b) structural: a program to bring all dikes on a height at which the probability of a collapse is 1:50 000 is in progress
Delta-works and the maintenance of dikes and locks
 3. Blizzards (a) non-structural: ---
(b) structural: ---
- (c) Ready access to global, regional, national and local warning systems and broad dissemination of warnings.
- The National Meteorological Offices gives forecasts by radio and television
 - Floods: The International Monitoring and Alarm Service Rhine is able to predict in the early stage.
